PROFESSIONAL PROFILE

I am a final-year Bachelor of Science (BSc) Geological Engineering student at Kwame Nkrumah University of Science and Technology (KNUST) with a strong interest in engineering geology, hydrogeology, geotechnical engineering, mineral exploration, geological modelling, mining technology, and digital transformation within the mining industry.

I am committed to applying engineering principles, analytical thinking, and emerging technologies such as Geographic Information Systems (GIS), geological modelling software, Python automation, and artificial intelligence to support safe, efficient, and sustainable engineering solutions.

CAREER OBJECTIVE

To begin my professional career within a reputable mining, engineering, environmental, or consulting organisation where I can apply my academic knowledge, technical skills, and commitment to continuous learning while contributing to mineral exploration, engineering investigations, groundwater development, infrastructure projects, and sustainable resource management.

EDUCATION

Kwame Nkrumah University of Science and Technology (KNUST)

Bachelor of Science (BSc) Geological Engineering

Expected Graduation: November 2026

Status: Final-Year Student

Location: Kumasi, Ghana

Key Areas of Study

- Engineering Geology
 - Hydrogeology
 - Geotechnical Engineering
 - Mineral Exploration
 - Geological Mapping
 - Exploration Geochemistry
 - Exploration Geophysics
 - Groundwater Development
 - Environmental Geology
 - GIS
 - Remote Sensing
 - Photogeology
 - Engineering Management
-

ENGINEERING PROJECTS

Career Operating System

Designed and developed a Python-powered career management platform that automatically generates professional documentation, HTML portfolio websites, résumés, and supporting documents from structured data sources.

Technologies

Python • YAML • Markdown • HTML • CSS • Git • GitHub • Pandoc

Orebody Modelling & Resource Evaluation

Academic project involving geological interpretation, orebody modelling, resource evaluation, and technical reporting to support mineral exploration and mine planning.

Groundwater Analysis of Heavy Metals

Hydrogeological investigation involving groundwater sampling, environmental interpretation, laboratory data analysis, and technical reporting.

TECHNICAL SKILLS

Geological Engineering

- Engineering Geology
- Geological Mapping
- Hydrogeology
- Geotechnical Engineering
- Mineral Exploration
- Orebody Interpretation
- Groundwater Development

Digital Technologies

- Python
- Git
- GitHub
- HTML
- CSS
- Markdown
- Visual Studio Code

SOFTWARE COMPETENCIES

| Software | Current Capability |

|-----|-----|

| Python | Workflow automation, scripting, document generation |

| Git & GitHub | Version control and documentation |

| ArcGIS Pro | Learning spatial analysis and mapping workflows |

| QGIS | Learning GIS fundamentals and spatial data management |

| Leapfrog Geo | Learning geological modelling fundamentals |

| Microsoft Office | Word, Excel, PowerPoint, Outlook |

CERTIFICATES

Google Project Management Professional Certificate

Completed through Coursera.

Topics included:

- Foundations of Project Management
 - Project Initiation
 - Project Planning
 - Project Execution
 - Agile Project Management
 - Project Capstone
-

Statistical Methods for Decision Making

Topics included:

- Probability Theory
 - Hypothesis Testing
 - Regression Analysis
 - Descriptive Statistics
 - Decision-Making Methods
-

PROFESSIONAL MEMBERSHIPS

- AGA Trust Fund
 - Society of Economic Geologists (SEG) Student Chapter
-

LANGUAGES

- English (Professional Working Proficiency)
 - French (Basic)
-

REFERENCES

Available upon request.
