Hiring Manager

[Company Name]

[Company Address]

Subject: Application for the Position of [Graduate Geological Engineer / National Service Personnel / Graduate Trainee]

Dear Hiring Manager,

I am writing to express my interest in the [Position] at [Company Name]. I am a final-year Bachelor of Science (BSc) Geological Engineering student at the Kwame Nkrumah University of Science and Technology (KNUST) with a strong passion for mineral exploration, engineering geology, hydrogeology, geotechnical engineering, mining technology, and the application of modern digital technologies to solve engineering challenges.

Throughout my academic journey, I have developed practical knowledge in geological mapping, engineering geology, mineral exploration, hydrogeology, groundwater development, engineering data interpretation,

exploration geochemistry, exploration geophysics, and technical report writing. These experiences have strengthened my analytical thinking, problem-solving abilities, and commitment to delivering high-quality technical work.

In addition to my engineering education, I have intentionally developed strong digital and technical skills that complement modern geological practice. I have experience using Python, Git, GitHub, HTML, CSS, Markdown, and Visual Studio Code to automate workflows, organize technical information, and improve productivity. I am also expanding my proficiency in ArcGIS Pro, QGIS, and Leapfrog Geo to support geological modelling, spatial analysis, and resource evaluation.

One of my most significant personal initiatives has been the development of a Career Operating System, a Python-powered platform that automatically generates professional documentation, portfolio websites, résumés, and technical reports from structured data. This project demonstrates my commitment to continuous learning, innovation, automation, and applying technology to improve engineering workflows.

I am particularly interested in joining [Company Name] because of its reputation for engineering excellence, operational integrity, commitment to safety, and investment in developing young professionals. I am confident that my willingness to learn, strong work ethic, technical foundation, and adaptability will enable me to contribute positively to your team while continuing to grow under the guidance of experienced engineers and geoscientists.

I welcome the opportunity to discuss how my academic background, technical skills, and enthusiasm for Geological Engineering can contribute to the continued success of your organization. Thank you for taking the time to consider my application. I look forward to the opportunity to speak with you.

Yours faithfully,

Anthony Essel Prepeh
