Professional Summary

Final-year Bachelor of Science (BSc) Geological Engineering student at Kwame Nkrumah University of Science and Technology (KNUST) with a strong foundation in engineering geology, hydrogeology, geotechnical engineering, mineral exploration and geospatial technologies.

Experienced in geological field investigations, engineering data interpretation, technical reporting and digital workflows. Passionate about integrating GIS, geological modelling, Python and artificial intelligence to improve mineral exploration, groundwater investigations and modern mining operations.

Committed to continuous learning, professional integrity and applying technology to solve practical engineering challenges while contributing to sustainable resource development.

Education

Kwame Nkrumah University of Science and Technology (KNUST)

Bachelor of Science (BSc) Geological Engineering

Expected Graduation: November 2026

Core Competencies

- Engineering Geology
 - Geotechnical Engineering
 - Hydrogeology
 - Mineral Exploration
 - Geological Mapping
 - Resource Evaluation
 - GIS
 - Remote Sensing
 - Engineering Problem Solving
 - Technical Report Writing
 - Data Interpretation
-

Technical Skills

Geological Engineering

- Engineering Geology
- Geological Mapping
- Structural Geology
- Mineral Exploration
- Hydrogeology
- Geotechnical Engineering
- Orebody Interpretation
- Groundwater Development

Geospatial

- GIS
- Remote Sensing
- Photogeology

Programming & Digital Technologies

- Python
- Git

- GitHub
 - HTML
 - CSS
 - Markdown
 - YAML
 - Visual Studio Code
 - Pandoc
-

Selected Engineering & Technical Projects

Career Operating System (*In Progress*)

Designed and developed an automated career management platform using Python, Markdown, YAML, HTML, CSS and Pandoc to generate a professional portfolio website, résumé, PDF documents and career resources from a single source of truth.

Technologies

Python • Git • GitHub • Markdown • YAML • HTML • CSS • Pandoc

Professional Engineering Portfolio (*Completed*)

Designed and developed a responsive engineering portfolio that presents technical skills, engineering projects, certifications and professional development using reusable templates and automated content generation.

Technologies

Python • HTML • CSS • Markdown • GitHub

Orebody Modelling & Resource Evaluation (*In Progress*)

Final-year Geological Engineering research project focused on orebody modelling, geological interpretation and mineral resource evaluation. The project applies engineering principles and geological analysis to support resource estimation and improve understanding of orebody geometry.

Technologies

Technical Reporting • Geological Interpretation • Data Analysis

Software & Technologies

Geological & Geospatial

- ArcGIS Pro (*Learning*)
- Leapfrog Geo (*Learning*)
- QGIS (*Learning*)

Development

- Python
- Git
- GitHub
- Visual Studio Code
- Markdown
- Pandoc

Microsoft Office

- Word
- Excel
- PowerPoint
- Outlook

Artificial Intelligence

- ChatGPT
 - GitHub Copilot
 - Codex
-

Professional Certifications

Professional development through Coursera, Great Learning, Alison and other recognised online learning platforms in engineering, technology, data analysis and artificial intelligence.

Professional Memberships

- AGA Trust Fund
 - Society of Economic Geologists (SEG) Student Chapter
-

Languages

- English — Professional Proficiency
 - French — Basic Proficiency
-
