Career Objective

To begin a professional career in Geological Engineering where I can apply my academic knowledge, technical skills, and commitment to continuous learning while contributing to mineral exploration, geotechnical engineering, groundwater development, and sustainable engineering projects.

Professional Summary

Final-year Bachelor of Science (BSc) Geological Engineering student at Kwame Nkrumah University of Science and Technology (KNUST) with interests in engineering geology, geotechnical engineering, hydrogeology, mineral exploration, GIS, remote sensing, groundwater development, and mining technology.

Passionate about combining geological science, engineering principles, digital technologies, and artificial intelligence to develop practical and sustainable engineering solutions.

Education

Kwame Nkrumah University of Science and Technology (KNUST)

Bachelor of Science (BSc) Geological Engineering

Expected Graduation: November 2026

Core Competencies

- Engineering Geology
- Geotechnical Engineering
- Hydrogeology
- Mineral Exploration
- GIS
- Remote Sensing
- Geological Mapping
- Technical Report Writing
- Engineering Problem Solving
- Data Interpretation

Technical Skills

Geological Engineering

- Engineering Geology
- Geological Mapping
- Structural Geology
- Mineral Exploration
- Hydrogeology
- Geotechnical Engineering
- Groundwater Development

Geospatial

- GIS
- Remote Sensing
- Photogeology

Digital

- Python
- Git
- GitHub
- HTML
- CSS
- Markdown

- Visual Studio Code
-

Projects

Professional Career Repository

Designed and developed a Python-powered career management repository integrating Markdown, YAML, HTML, CSS, automation scripts, and GitHub for maintaining resumes, portfolio website, and professional documentation.

Educational Portfolio Website

Developed a responsive personal portfolio website generated from Markdown and YAML using Python automation with reusable layouts and modular components.

Undergraduate Research Project

Conducting final-year Geological Engineering research involving technical investigation, literature review, data interpretation, and scientific reporting.

Software & Technologies

Productivity

- Microsoft Word
- Microsoft Excel
- Microsoft PowerPoint
- Outlook

Development

- Python
- Git
- GitHub
- Visual Studio Code
- Markdown
- Pandoc

Artificial Intelligence

- ChatGPT
- GitHub Copilot
- Codex

Currently Learning

- ArcGIS Pro
 - Leapfrog Geo
 - QGIS
 - AutoCAD
-

Professional Memberships

- AGA Trust Fund
 - Society of Economic Geologists (SEG) Student Chapter
-

Languages

- English (Professional)
 - French (Basic)
-
